Introduction

What you will find in this report

This report contains the results of the feedback collected for you. These results are presented to help you identify your strengths, areas for development, and areas where your ratings may diverge with individuals providing you feedback.

We hope that you remember from your own experience how difficult it can be to provide others with this type of feedback, be open to considering their opinions, and be willing to use their feedback in your development.

Goals of the 360 Degree Feedback

Multi-Source Feedback presents a more complete picture of an individual's behavior and performance by drawing information from different perspectives within the work environment. It gives recipients a resource to guide their development, and reviewers' additional input.

Feedback from multiple sources helps you in several ways, including increasing awareness of your strengths, how you are perceived by others in different roles, and providing input for your professional development.

Receiving Feedback

Receiving feedback is a tremendous opportunity to discover how you are perceived by others which may be similar or dissimilar to how you perceive yourself. It is important to reflect on your feedback as a tool to help you set specific goals for professional development. This can be done when you see the feedback as it is, a perspective on where you may improve your performance and working relationships. It is important to realize that seeking and receiving constructive feedback is the only way we can see our "blind spots." This feedback may help us to understand the negative impact our actions may unintentionally have on others.

What to Do with Your Feedback

Use your feedback to help you develop awareness and set goals for developing your effectiveness. This can be done if you see the feedback as multiple perspectives on where you are already strong or can improve in the defined areas of effectiveness.

Summary

The questionnaire items used in this feedback process asked respondents to rate specific behaviors and competencies identified by [Your Company Name] current leaders. These behaviors and competencies fall into 7 major dimensions of leadership.

The summary scores for each dimension shown below were calculated by averaging all respondents' scores for all of the questions within that dimension. These dimension summary scores are sorted from high to low, with the highest shown at the top. The dimensions toward the bottom may need the most development.

Gap Analysis

The following table graphically displays the "Gap," or difference between your average rating on each competency (labeled "Self") and the average score of all other respondents (labeled "Others") who provided you with feedback. This can help you identify blind spots, or areas where you were rated more favorably by other respondents than by yourself. The Gaps for these competencies are colored in shades of green. Conversely, the graph can also help you identify your opportunities for improvement, or areas where you rated yourself higher than others did. The Gaps for these dimensions are colored in shades of red. The darker the shade of green or red, the larger the Gap. Finally, if a dimension's Gap is not shaded with a specific color, it indicates an area of agreement between yourself and others.
