Introduction

What you will find in this report

This report includes the feedback results gathered for you. It is designed to assist you in recognizing your strengths, identifying areas for improvement, and understanding where your self-assessment may differ from the feedback providers' perspectives.

We trust that you will recall from your experiences the challenge of offering such feedback, remain receptive to different viewpoints, and be prepared to incorporate this feedback into your personal development.

Goals of the 360 Degree Feedback

Multi-Source Feedback offers a comprehensive view of an individual's behavior and performance by incorporating diverse perspectives from the workplace. It provides recipients with valuable insights for their development and enriches reviewers with additional feedback.

Receiving feedback from various sources can enhance your self-awareness, illuminate how others perceive you across different roles, and contribute to your professional growth.

Receiving Feedback

Feedback is a valuable tool for self-reflection. It helps us understand how others perceive us, which can differ from our own self-image. By reflecting on feedback, we can set specific goals for professional growth. It's important to view feedback as a perspective on how we can improve our performance and relationships. Seeking and receiving feedback is the only way to uncover our "blind spots" and learn about the unintended negative consequences of our actions.

What to Do with Your Feedback

Use feedback to better understand yourself and set goals for improvement. Consider feedback as different perspectives on your strengths and weaknesses in specific areas where you want to be more effective.

Summary

In this feedback process, the questionnaire items prompted respondents to evaluate specific behaviors and competencies recognized by COMPANY's present leaders. These behaviors and competencies are categorized into 7 principal dimensions of leadership.

The summary scores for each dimension, displayed below, were derived by averaging the scores for all questions within that dimension from all respondents. These summary scores are arranged in descending order, with the highest scores at the top. The dimensions listed towards the bottom are the ones that may require the most development.

Gap Analysis

These charts graphically represent the "Gap" indicating the difference between your average self-assessment on each competency and the average rating given by other respondents. This visualization aids in identifying blind spots—areas where others rated you more favorably than you did yourself, indicated by varying shades of green. In contrast, it also highlights areas for improvement—where you rated yourself higher than others, shown in shades of red. The intensity of the color correlates with the size of the Gap. If a competency's Gap is not colored, it signifies consensus between your self-assessment and others' feedback.

Accountability means taking responsibility for meeting performance expectations and being answerable for the outcomes. It recognizes that actions have consequences, which reflect our commitment to accountability. When individuals aim for high accountability, their performance improves. Accountability exists in a variety of ways including: performance appraisals/reports, delegation of responsibilities, expectations of results, keeping the supervisor informed, being on time, and treating employees well.
