# Gap Analysis

The following table graphically displays the "Gap," or difference between your average rating on each competency (labeled "Self") and the average score of all other respondents (labeled "Others") who provided you with feedback. This can help you identify blind spots, or areas where you were rated more favorably by other respondents than by yourself. The Gaps for these competencies are colored in shades of green. Conversely, the graph can also help you identify your opportunities for improvement, or areas where you rated yourself higher than others did. The Gaps for these dimensions are colored in shades of red. The darker the shade of green or red, the larger the Gap. Finally, if a dimension's Gap is not shaded with a specific color, it indicates an area of agreement between yourself and others.
